MIKE BECKER'S

AVIATION FOUNDATION COURSE

SHAPE THE FUTURE OF AVIATION

Aviation is evolving faster than ever. New helicopter designs, UAVs, Advanced Air Mobility (AAM), and AI-driven technology are reshaping the industry - but innovation needs skilled professionals to make it a reality. Pilots, engineers, technicians, aviation enthusiasts - we need you!

If you're passionate about aviation but don't know where to start, this course is for you. No prior experience needed - just curiosity and ambition. Gain the foundational knowledge to explore careers in piloting, engineering, air traffic control, or aviation business management.

What you'll learn

- ✓ Aviation Fundamentals
- ✓ Helicopter and UAV Basics
- ✓ Aviation Communication & Navigation
- ✓ Meteorology & Human Factors
- ✓ Aviation Law & Emerging Technology
- ✓ With nine self-paced modules, you'll build a solid foundation and earn a VAI Certificate of Completion

Who should enrol?

- ✓ High School students exploring aviation careers
- ✓ Aspiring professionals looking for an entry point
- ✓ Aviation enthusiasts

Take-off today

The aviation industry is waiting for the next generation. Will you be one of them?
